Appraisal Services

The Sandner Group
has provided high quality
appraisal services to schools and
public entities for over two decades.

A major concern for risk managers, insurers, and consultants is the accuracy of property records and property values. An effective property valuation program ensures that properties in your organization's portfolio are accurately tracked and insured to value. The Sandner Group Claims Management offers an array of services designed to help organizations meet their insurance reporting requirements.

Property Insurance Valuations

- Buildings
- Contents
- Site improvements

Customized Reports

- Digital photos
- Reconstruction cost values for each building section
- Custom building diagrams
- Annual update services
- Building underwriting data
- Fire protection identification
- Competitive rates

The Sandner Group appraisal services enable your organization more accurately determine insurance requirements, which ensures that property and assets are adequately covered in the event of a loss. Likewise, our appraisal services can determine if your organization is making unnecessary expenditures by over-insuring property and assets. In addition, accurate valuation records compiled by an objective third party like The Sandner Group can serve as proof-of-loss documentation in the event of a claim.
